TANKS

DETERGENT DISPENSING TANKS AND EQUIPMENT ON LOAN AS PART OF THE ETS DELIVERY PROGRAM!

100 & 150 gal

Dispenser dimensions: (Floor space" x height")

100 = 22 x 22 F.S. x 69 H
150 = 29 x 29 F.S. x 76 H

These standard ETS tanks are heavy walled, see through, cylindrical poly tanks that are clearly calibrated by gallons and liters with tamper resistant bolted on covers. Each tank is vertically designed to provide efficient dispensing and minimize floor space requirements. They are available with a 3/4" bottom fitting that accepts a corrosion resistant poly valve or locking steel ball valve. The tanks rugged steel angle iron base elevates it high enough to fill a bucket. Each tank also accepts the optional soap and water dilution devises.

110 gal portable

Dispenser dimensions: (Floor space" x height")

110 = 57 x 30 F.S. x 40 H

Here is a special tank for customer placement locations that are NOT accessible by the ETS truck hose. We designed this roll about 110 gallon low profile horizontal poly tank on a six castor rugged cart. Portability also allows this unit to dispense ETS DETERGENTS at various locations within the customers facility. It also accepts optional soap and water dilution devises.

275 gal tote

Dispenser dimensions: (Floor space" x height")

Without Base Stand 275 = 48 x 40 F.S. x 46 H
With Base Stand 275 = 48 x 44 F.S. x 65 H

For greater detergent volume requirements and for those customers slightly beyond our regular geographic delivery range, ETS offers this industrial 275 gallon tote customized with an 8' extension hose and dispensing gun. Customers can forklift transport it to remote areas of their facility. An optional steel angle iron base stand is available. It also accepts optional soap and water dilution devises.

TANK OPTIONS:

No valve

Pad lock valve

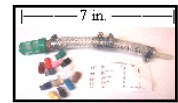

Spigot

Hose & valve

Soap + water
diluting unit

Soap Restrictor assembly

(SEE SEPARATE TANK OPTIONS SHEET FOR DETAILS)

AUTOMATED INDUSTRIAL
DETERGENT
DELIVERY SYSTEM

TANK OPTIONS

OPTIONS AVAILABLE WITH THE ETS DETERGENT DISPENSING TANKS.

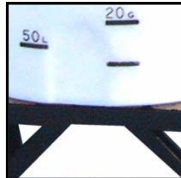

Spigot

Our standard valve is this corrosion proof reliable 3/4" poly spigot. It is installed at the bottom of the tank allowing the proper rate of flow of detergents into open pail containers. With its male garden hose threads, it also accepts a short hose for filling closed top containers.

Pad lock valve

To prevent unauthorized use of the detergents and for added security, we offer this carbon steel ball valve assembly that accepts your combination or keyed pad lock. It is installed at the bottom of the **ETS DISPENSING TANK** for filling open and closed top containers.

No valve

For absolute control over unauthorized use of the detergents, you may choose no valve. This option allows for your pressure washer to draw the detergents from the top of the tank. Both the optional *soap restrictor assembly* that attaches to your pressure washer soap pick up tube or the *soap and water dilution unit* can be utilized. (Both shown below.) NOTE: Tank may be supplied with a plumbing plug instead of a spigot valve.

Hose & valve

This 3/4" rugged extension hose and carbon steel ball valve allows for fast dispensing of detergents. (Only available on the 275 gallon tote tank.) Standard hose length is 8 ft. long. For safety an additional valve is located at the tank outlet providing double control.

Soap restrictor assembly

The soap restrictor assembly, created by ETS Co. for the **ETS DETERGENT DELIVERY PROGRAM** attaches at the end of your pressure washers soap draw tubing. ETS extends your machines tubing for it to reach to the bottom of the dispensing tank where the restrictor assembly rests. Within the assembly is one of twelve plastic colored restrictors, each with a precisely drilled orifice hole to allow only a predetermined flow of detergent to be drawn into your pressure washer. No more dilution guess work! (See *ratio dilution chart*)

Soap & water diluting unit

Fill containers or automatic floor scrubbing equipment tanks with an exact soap to water dilution ratio every time! ETS provides the tap water supply hose to attach from your water spigot to this device. It mounts securely atop ANY of our detergent dispensers. One of twelve different colored plastic orifices allow only a precise dilution every time. Just open the tap water flow valve to fill and close it when you are done. (This unit adds 12" in height to all dispenser tanks.)

CUSTOMIZE YOUR DETERGENTS WITH

AUTOMATED INDUSTRIAL
DETERGENT
DELIVERY SYSTEM

ADDITIVES

These product additives are added to your dispenser tank by the delivery driver prior to each refill of your tank.

ORANG BOWL™ Citrus scent

Give your detergent the fragrance of citrus. 1 Quart of **ORANG BOWL™** can be added to every 50 to 100 gallons of any **ETS** detergent.

Stock No: CPCP-098501

Price: \$15.27

per Quart

ELIMINATOR™ Foam Reducer

Foam reduction is sometimes desired when using automatic floor scrubbing equipment, carpet extraction equipment, or in waste water recovery and treatment systems. 8 oz. of **ELIMINATOR™** can be added to every 25 gallons of concentrated **ETS** detergents.

Stock No: CPCP-123008

Price: \$5.06

per 8 fl. Oz.

FOAMER™ Foam Increaser

When the use of **ALL STAR™** detergents reach into the extreme high dilution ranges of 75:1 or 150:1 the additional foamer is sometimes desired.

Stock No: CPCP-201010

Price: \$12.63

per Gallon

KICK™ Alkalinity Booster

For lower alkaline products such as **ETS** detergents; **INTERCEPT™** or **PHOTO FINISH™**, **KICK™** can be added to increase their pH levels and ability to break down and soften dried out, caked on greases. One gallon of **KICK™** can be added to every 25 gallons of concentrated detergent.

Stock No: CPCP-410010

Price: \$5.90

per Gallon

BANNER™ Colorants

For various reasons detergents with color are sometimes desired. The **ETS** line of **BANNER™** colorants are available. 16 oz. of concentrated colorant can be added to every 25 gallons of concentrated detergent.

Stock No: CPCP-XXXXXX

Price: Call

16 per fl. Oz.

All pricing subject to change without notice. ETS reserves the right to refuse any order.
