

INDUSTRIAL CLEANING DETERGENT SPECIALISTS

PRODUCT INFORMATION SHEET

**A granular powder
that works to
dissolve scale and
lime build-up in hot
high pressure washer
heating coils**

COIL DOCTOR is a biodegradable odorless white crystalline powder that

when dissolved is circulated through the heating coil in a hot high pressure washer works to dissolve scale build-up. Caused by rust, calcium and soap. Unlike muriatic (hydrochloric) acid, COIL DOCTOR can be circulated by most high pressure washer pumps without causing damage to the high pressure pump or other components. COIL DOCTOR is also a safer alternative to aggressive muriatic acid descaling products.

DIRECTIONS:

- 1) Dissolve six pounds of COIL DOCTOR into a bucket with four and a half gallons of cool water.
- 2) Using a short inlet hose, setup to draw the dissolved COIL DOCTOR into the power washer high pressure pump inlet.
- 3) Remove the trigger gun from the discharge hose assembly from the power washer and place hose end into bucket to create a circulation of the dissolved COIL DOCTOR for a period of one to three hours depending on scale buildup.
- 4) Flush power washer with fresh water at the end of the descaling process.

PACKAGING
WASHOUT is available in 6 lb. bag only.
CPCP-101006

WARNING: CORROSIVE.
CONTAINS AMIDOSULFONIC ACID. HANDLE WITH CARE.
KEEP OUT OF THE REACH OF CHILDREN.
