

FOUL OUT™ is a liquid odor digester. It contains a unique blend of enzyme producing bacteria that safely and naturally illuminates odors of urine, vomit, trash and other organic matter. FOUL OUT is not simply a fragrance mask. Spray **FOUL OUT™** at the source of the odor, immediately 50 billion dormant enzymes (per gallon) start censuring the odor source. They then multiply, creating more enzymes to further combat the odor. When the odor source disappears, so do the enzymes. **FOUL OUT™** will also remove organic stains in carpets and fabrics.

DIRECTIONS:

To digest foul odors around bathroom fixtures, trash containers and other hard surfaces;

1) Dilute **FOUL OUT™** 16-20 oz. per gallon of. water. Use as you would an ordinary detergent to clean the contaminated area.

2) While surface is still wet, spray areas thoroughly with full strength **FOUL OUT™**. Spray daily until all entrapped odors are digested. There-after treatment is generally needed only weekly or monthly.

TO DIGEST ODORS IN URINAL DRAINS AND TRAPS
Treat urinal when it will not be used for an extended period. Initially pour 1 pint to 1 quart in trap. For continued maintenance, add 4 ounces twice weekly. **DO NOT FLUSH AFTER TREATMENT IS ADDED.**

TO DIGEST ODORS IN CARPETS. UPHOLSTERY & FABRICS TO REMOVE ORGANIC STAINS

1) Dilute **FOUL OUT™** at 8 oz. per gallon of water.

2) Apply solution to an out of the »ay spot and test textiles for color-fastness.

3) If article is color-fast, use solution to clean soiled area.

4) After cleaning, spray with full strength **FOUL OUT™** until area is saturated.

5) Rinse with water. Blot with clean, dry towel or pick up with wet-vac.

CAUTION: Contains live bacteria cultures. May cause an allergenic skin or respiratory reaction. Avoid breathing spray. Wash hands after use. Do not swallow or allow contact with eyes, open cuts or sores. If contact occurs, flush thoroughly with plenty of water. If swallowed, call a physician. SEE MATERIAL SAFETY DATA SHEET.
